

TESTED ON THE RACETRACK

PERFORMS  
ON THE ROAD

From Le Mans to British Touring Car, the world's top drivers trust Dunlop to give them the edge. And what we learn on the racetrack we pass on to you.

Dunlop tyres are able to bring advanced levels of refinement, grip, braking power, cornering, and road-handling benefits to all drivers through superior road feedback. We call this Touch Technology.

**ENJOY PERFORMANCE. ENJOY CONTROL.**

Pushed to their limits on the racetrack, Dunlop tyres deliver outstanding performance on the road. That's why two times British Touring Car champion Matt Neal puts every bit as much trust in the Dunlop tyres he uses at home as he does on the racetrack.

Every one of the tyres you find here will have a bit of racetrack in them. Take the long way home and enjoy every twist and camber with the superior road feedback Dunlop's

Touch Technology gives you. No wonder so many of the world's greatest drivers' cars specify Dunlop tyres as original equipment.
