

MITAS RADIAL RD-03

The best for my soil

The advanced tractor tyre Mitas Radial RD-03 protects the soil through a larger tyre footprint and optimal weight distribution. Besides, the lower rolling resistance of the tyre means lower fuel consumption and better economy. Crafted for excellent traction, the tyre allows a heavier load at the maximum utility speed of 43 mph on road. Find out more at www.cgs-tyres.com/mitas.

MITAS RADIAL RD-03

- + gentle ground handling + greater load capacity + lower fuel consumption
- + better traction + maximum speed of 43 mph
