On Site Testing, Calibration and Certification

If you have had enough of your calibrations been done to suit the calibration company and not yourself, then BAB Calibration Services are for you.

We can provide electronic certification if required, set up, keep and update your calibration file, to your specifications as required. Our calibration vehicle is self contained with the latest Norbar analysers (we can calibrate from 1Nm up to 1500Nm).

Special Introductory Offer

For a 2 year twice yearly calibration agreement

10% discount on charges + Fixed charge rate for 2 years!
