

Tyre Wear:

Initial tests show excellent performance when compared to leading manufacturers

Why buy Ascenso tyres?

Ascenso tyres are a **cost-effective** tyre solution that not only **looks good but performs fantastically**. The farm radial tyres all come with **65k speed** ratings and the latest **Mud Breaker Technology** for **optimal performance** both in and out of the field.

What tyres do Ascenso offer?

- Tractor radial tyres
- Tractor Crossply tyres
- Implement tyres
- Trailer Flotation tyres
- Plant and Industrial tyres
- Earthmover tyres
- Forestry tyres

Ascenso Warranty:

5 ★★★★★
year warranty

on Bias tyres

7 ★★★★★★
year warranty

on Farm Radial tyres

Original Equipment on:

Ktwo

Warwick trailers

Fitments out for testing on:

Chandlers (Farm Equipment) Ltd

What is the Mud Breaker Technology?

The mud breaker and the dual mud breaker ensure better self-cleaning and maximum traction. During the process of movement, vertical cleats on the lugs will behave like a lever to push the mud away and create an air channel to break the vacuum which helps in self-cleaning characteristics.

"As a large farming company which runs 150+ tractors, we asked Pete at Bush Tyres to test leading makes of tyres on our tractors to see which came out best on hours to save money on our fleet. In August 2021 we fitted two 420/70R28 Ascenso on a John Deere leading in tractor used for all road work. We checked these again in January 2022, having done 842 hours on them and they still had 31mm of tread left. This means these tyres have already outperformed other premium tyre brands by a good number of hours and will lead to fantastic savings on our fleet tractors. As a result, we had a meeting with Pete regarding which tyre make to fit in 2022 and agreed to fit Ascenso. We have also fitted four John Deere tractors with 480/70R24 and 520/70R38 Ascenso."
